

CLINICAL BEHAVIORAL INSIGHTS

Insight-Driven Education

Deliver Differentiated
Clinical Education

IntrinsiQ Specialty Solutions' proprietary clinical insights can help you understand the current treatment dynamics within an individual practice, as well as help physicians gain visibility into how they are managing patients of interest compared to their ION peers. These treatment insights can be leveraged to specifically tailor your education programs to the unique needs of different practices, driving more appropriate treatment choices and ultimately improving patient care.

Key Benefits

- **Utilize key clinical data assets** by leveraging ION Solutions' Nucleus Inventory Management cabinet, Specialty Oncology Network's in-office dispensing information and precision medicine data, when available
- **Benchmark towards good clinical practice** based on national clinical guidelines where appropriate and compare against other ION Solutions' practices
- **Customize educational messages** based on the needs of the participating practice to help improve the management and treatment of their specific patients
- **Identify practices** where there are patients that fit the indication for a drug, but have low usage, or when optimal durations of therapy are not being achieved
- **Transition to value-based contracting** by making more appropriate treatment decisions at the point of care

Types of Insights:

- Patient attributes: Gender, age
- Treatment attributes: Regimen, dosage, # admins, line of therapy, time between admins, time to treatment progression, supportive care use
- Disease attributes: Diagnosis, biomarkers
- Benchmarking data: Parent and/or child level compared to published, national standards or other ION Solutions' practices

Optimize your drug's performance by delivering differentiated education to physicians for better management and treatment of their patients.
